

I have been alerted that you are comming up with a new broadcast service which may get rid of many FM stations. I disagree fully with this. I am a litener of Airl (90.3 FM) and if this new way of broadcasting gets rid of Airl I will be greatly displeased. Airl is extreamly helpful. From their news sections in the morning, to their hour long information show on Sunday. Also the music is great. Positive Christian Rock which always seems to pick me up. If this new broadcasting system is able to expand, then airl will vanish as well as many other radio stations.
